Editing 101

1. Log in to Wikipedia
2. Find an article you wish to edit (see Articles on the program dashboard)
3. Visit the Talk Page to learn more about the article’s history
4. Click edit to bring up the visual editor
5. Edit the content
6. Cite your edit using a secondary source (i.e.: a scholarly journal article, an encyclopedia article, a newspaper article, etc. If you have questions ask a librarian!)
7. Select Publish Changes at the top right-hand corner
8. Briefly describe your changes (i.e.: Added content to Exhibitions, including citations) and click Publish Changes
   a. Select minor edit if you’ve made typographical corrections, formatting changes, or rearrangement of the text without modification of the content. Don’t select if you’ve added a citation (someone will want to verify that!)
