

Receiving alerts from ejournals

Database method: You can receive alerts when new items are listed in a database. These alerts can be based on a journal title or a particular set of search terms. The screen shots below show two examples from MLA.

Searching: **MLA International Bibliography** | [Choose Databases](#)

emily dickinson journal in **SO Journal Title** **Search** **Clear** [?](#)

Ejournal website method: Interfaces for ejournals differ depending on the publisher. When you are on the website for a particular journal, look for the orange RSS symbol or a link named “Get New Content,” “Receive TOC alerts,” or something similar. With some you will have the option to receive the alerts via email while some others may only be delivered as an RSS feed.
