**Additional Free E-Books with High Quality Information**

**CDC Stacks**
Centers for Disease Control and Prevention. Free full-text scientific research. In the Advanced Search, for the bottom box, you can choose Language field and select English. Use quotation marks to search for a phrase. [https://stacks.cdc.gov/welcome](https://stacks.cdc.gov/welcome)

**National Academies Press**
"...provide expert advice on some of the most pressing challenges facing the nation... Our work helps shape sound policies, inform public opinion, and advance the pursuit of science, engineering, and medicine... we have earned a solid reputation as the nation's premier source of independent, expert advice on scientific, engineering, and medical issues." Environmental health category. [https://www.nap.edu/topic/389/health-and-medicine/environmental-health](https://www.nap.edu/topic/389/health-and-medicine/environmental-health)

**National Technical Reports Library**
There is a subject category for Environmental Health & Safety. WUSTL has many of the paper reports, but you can limit to full-text. The Advanced search allows basic Boolean searching. [https://ntrl.ntis.gov/NTRL/](https://ntrl.ntis.gov/NTRL/)

Search Example 1

PubMed Search – Free to the world. Focus is on health.

Advantages of using MeSH

- Automatically pulls up related terms filed underneath the main term (saves you typing).
- Groups similar articles under the same MeSH term so you don’t have to worry about synonyms.

Disadvantage

- Most recent 6 months may not show up while the articles are waiting to be assigned MeSH terms.
- Use the Advanced search mode to search Title/Abstract for the most recent 6 months of citations.

While at WUSTL, use the library website to access PubMed. Then, you will have the green Get It buttons for full-text.

What is the relationship between traffic-related air pollution and respiratory health outcomes in children?

Traffic terms: traffic, car, cars, autos, automobiles, vehicles, diesel engines, etc.

Air pollution terms: air pollution, smog

Respiratory health terms: respiratory health, respiratory wellness

Children terms: none because PubMed has a filter for limiting to children

MeSH database:
Traffic terms: no traffic -> use Motor Vehicles. No diesel engines. Try diesel which leads to Vehicle Emissions.

Respiratory health terms: no respiratory health or wellness. Try respiratory diseases -> Respiration Disorders -> Respiratory Tract Diseases

- Use the Advanced Search mode to combine the search sets.
- Use Show Additional Filters to display the Languages and Ages filters.
- Limit to Children: birth to 18 and Limit to English.

When you mark citations and send them to the clipboard, your set of marked items will show up as set zero in the Advanced Search mode.

- Recent Activity provides a link so that you can share the search with others.
Search Example 2
PubMed Search.

What are the current policies that address traffic-related pollution in communities?

Traffic terms: already in the Advanced Search mode.

Air Pollution terms: already in the Advanced Search mode.

Policy terms: policy, policies, regulations, etc.

MeSH terms: Remove all of the Limiting filters by clearing them!

Policy -> Policy which also pulls up Fiscal Policy, Smoke-Free Policy, Social Control Policies, Organizational Policy, Public Policy. Also in the result list for Policy, choose Environmental Policy. Also in the result list for Policy, choose Policy Making. Also in the result list for Policy is Health Policy. Also in the result list for Policy is United States Agency for Healthcare Research and Quality. Next try regulations -> Government Regulation.

Use the Advanced Search mode to combine the search sets.

Choose the filter for English. Consider a limit for publication years.

- PubMed doesn't have many science or social policy journals. It is best to run the Policy search in another database.

Search Example 3
What are the current policies that address traffic-related pollution in communities?

- Use Academic Search Complete to get into the Ebsco group of databases.
- Choose Databases. (link above the search boxes, top, left)

traffic OR "car" OR "cars" OR "autos" OR automobile* OR "vehicle" OR "vehicles" OR "vehicular" OR "truck" OR "trucks" OR "trucking" OR "bus" OR "buses" OR motorcycle* OR "semi-trailer*" OR "van" OR "vans" OR "diesel exhaust" OR "diesel engine exhaust" OR "gasoline exhaust" OR "gasoline engine exhaust" OR "diesel emissions" OR "diesel engine emissions" OR "gasoline emissions" OR "gasoline engine emissions"
"air pollution" OR "airborne pollution" OR "air pollutants" OR "airborne pollutants" OR "air particulates" OR "airborne particulates" OR "volatile organic" OR "air quality" OR "particulate matter" OR "air environmental pollutants" OR "smog"
